

PICCOMINI®

## PICCOMINI®

Plants at home and in the office give a “better feeling”. The green presence gives an atmosphere and tranquility. Unfortunately, there is not always enough space in the home and office to place a large plant. However, there are always mini spots such as on the corner of your desk or a ledge in the kitchen. For these small places, there is the PICCOMINI® plant collection.

PICCOMINIS® are cool, trendy succulents in pot size 6 cm that give you the great benefits of plants.

## Plant care

The succulent specifics make the PICCOMINI® easy to care for. The plant stores water in its leaves so it needs little water.

When watering, it is recommended to let the plant drink from a plate. One or two weeks without water is no problem for the PICCOMINI®. Therefore a PICCOMINI® is an easy friend to get along with and a lot of fun to give and receive.
